Skills

- **Networking Protocols:** TCP/IP, DNS, DHCP
- **Remote Access:** VPN, RDP, SSH
- **Network Diagnostics:** Ping, Tracert, Nslookup, Ipconfig
- **Ticketing & Support:** Spiceworks, ITIL Framework Basics
- **Cloud & Virtualization:** Azure, VirtualBox
- **Operating Systems:** Windows Server, Ubuntu Server, Linux
- **Scripting & Automation:** PowerShell, Bash, Python
- **System & Access Management:** Active Directory
- **Office 365**
- **Containerization:** Docker
- **CI/CD:** GitLab
- **Monitoring and Observability:** Prometheus & Grafana

Projects:

Enterprise Windows Server 2022 & Active Directory Architecture

- **Infrastructure Design**: Architected a highly available Active Directory forest on Windows Server 2022, featuring AD-Integrated DNS, an 80/20 DHCP failover cluster, and tiered Organizational Units (OUs).

- **Identity & Security (IAM):** Enforced strict Role-Based Access Control (RBAC) via the AGDLP framework and deployed security-hardened GPOs (SMBv3 enforcement, NTLMv1 deprecation, and delegated USB storage lockdowns).

- **PowerShell Automation**: Developed a zero-touch PowerShell pipeline for automated bulk user provisioning from CSV datasets, handling dynamic OU routing and secure credential generation.

- **Advanced Troubleshooting**: Resolved complex domain infrastructure issues, including Kerberos authentication failures via authoritative NTP synchronization and domain join errors via DNS SRV record remediation.

IT Service Desk & Ticketing Simulation

- Managed and resolved simulated Tier 1 and Tier 2 IT support tickets using Spiceworks, effectively logging, categorizing, and prioritizing user issues.

- Applied ITIL best practices for incident management, ensuring tickets were addressed within designated Service Level Agreements (SLAs).

- Documented troubleshooting steps, root cause analyses, and final resolutions for issues relating to Active Directory, network connectivity, and hardware failures.

- Simulated escalation workflows by routing complex infrastructure and server-level incidents to appropriate Tier 3 administrative groups.

Languages

- **Portuguese**: Native / Fluent (**C1**)
- **English**: Intermediate / Working Proficiency (**B1**)
- **Spanish**: Basic (**A1+**)
